

UNIDOORS

The company Unidoors would like to thank you most sincerely for taking an interest in our products. As of today there are more than 20 countries all over the world from Mongolia to the USA in which doors are sold under the brand name UNIDOORS. We have over 10 years of experience in the production of interior doors which enables us to look to the future with confidence and to assure our partners that the most advanced technology and materials shall be used in the manufacturing process with the result that the product will meet the most rigorous quality and environmental safety standards. The unity of the design and functionality is the motto of our company and the results that you see in the shop window are the fruit of the whole company's work.

Best regards,
The Staff of the Unidoors Company

TECHNIKS series – First and foremost it represents a revolutionary quality-price ratio. A joint effort of the Eko Shpon coating manufacturers, leading European developers and designers made it possible to offer a revolutionarily low market price without any loss of consumer appeal.

Here are some advantages over analogous products:

- Price
- Safety (all glass panes are of a small size and are fixed with a special rubber sealing)
- Noise insulation
- Convenience of use (the doors are totally of a match-all and symmetrical design. There is no left/right, top/bottom distinctions)
- The option of obtaining the skirting board of the same decorative pattern as that of the jamb lining (a challenge that practically goes unmet today)
